

## LONG BLOOMING PERENNIALS

When planting a perennial garden, many gardeners are looking for the most bang for their buck. We have compiled a list of long blooming perennials that will bloom about 10 weeks or longer. Availability will depend on seasonal fluctuations.

While a long bloom season is inherent in these perennials, you can get the most blooms by following these few guidelines. With all plants it is important to plant correctly and to water regularly during the growing season. You don't get a second chance to do it right the first time, so make sure your soil is well amended with an organic material like compost when you plant. In summer mulch your beds with an inch or two of bark or compost to keep your soil moist and to reduce the weeds. Deadheading will keep many perennials blooming longer. Remove each flower after it blooms and before it seeds. Many perennials will re-flower over and over. These perennials will work hard for you, so reward them with a nice fertilizer a couple of time each summer.

BOTANICAL	COMMON	SUN	HT	COLORS								COMMENT
				white	cream	yellow	orange	pink	red	purple	blue	
<i>Achillea spp.</i>	Yarrow	S	1.5-5 ft	X	X	X	X	X	X	X		Drought resistant, spreads rapidly.
<i>Anemone sylvestris</i>	Snowdrop Anemone	PS	20"	X								Early spring color.
<i>Armeria maritima</i>	Sea Pink	S	8"	X				X	X			Prefers poor soil.
<i>Asclepias tuberosa</i>	Butterfly Weed	S	3 ft			X	X		X			Good cut; naturalizes well; easily grown.
<i>Bergenia cordifolia</i>	Bergenia	PS	2 ft					X	X			Early spring color. Tolerates sun & drought.
<i>Callirhoe involucrata</i>	Wine Cups	S	12"						X	X		Drought and heat tolerant.
<i>Campanula lactiflora</i>	Milky Bellflower	S-PS	4-5 ft	X						X	X	Often requires staking; self-sows.
<i>Centranthus ruber</i>	Jupiter's Beard	S	3 ft	X				X				Deadhead; prefers poor soil.
<i>Coreopsis</i>	Coreopsis	S-PS	1-4 ft			X		X				Deadhead; blooms best in full sun.
<i>Corydalis lutea</i>	Yellow Corydalis	PS	16"			X						Early spring color.
<i>Delosperma cooperi</i>	Ice Plant	S	2"					X				Needs very well-drained soil.
<i>Dicentra eximia</i>	Fringed Bleeding Heart	PS-SH	2 ft	X				X				Blooms April to September.
<i>Echinacea purpurea vars.</i>	Coneflower	S	1-5 ft	X			X	X		X		Tolerates heat, drought and poor soil.
<i>Fuchsia</i>	Fuchsia	S-PS	1-6 ft	X				X	X	X		Feed regularly during summer.
<i>Gaillardia spp.</i>	Blanket Flower	S	8-36"			X	X					Deadhead; drought tolerant.
<i>Gaura lindheimeri vars.</i>	Indian Paintbrush	S-PS	2-5 ft	X				X				Will tolerate drought.
<i>Geranium sanguineum</i>	Hardy Geranium	S-PS	6-18"	X				X		X		Self-sows.
<i>Helianthus 'Flore Pleno'</i>	Flore Pleno Sunflower	S	6 ft			X						Give extra water during hot weather.
<i>Hemerocallis 'Stella D'Oro'</i>	Stella D'Oro Daylily	S-PS	12"			X						Tolerant of many growing conditions.
<i>Heuchera sanguinea</i>	Coralbells	S-PS	12-28"	X				X	X			Deadhead; prefers rich, moist soil.
<i>Hibiscus moscheutos</i>	Rose Mallow	S	4-8 ft	X				X	X			Prefers humus-rich, moist soil.
<i>Knautia</i>	Knautia	S	2-6 ft			X			X	X	X	Thrives in heat and full sun.
